PROFESSIONAL SUMMARY

UX Designer / Researcher with an M.S. in Human-Computer Interaction and 2+ years of hands-on experience conducting user research, designing accessible interfaces, and delivering data-driven design improvements. Skilled in the full UX lifecycle — from discovery interviews and usability testing to wireframing and prototyping in Figma. Proven ability to translate complex user needs into intuitive, inclusive experiences while collaborating cross-functionally with engineers, product managers, and stakeholders.

SKILLS

UX Research: User Interviews, Usability Testing, Heuristic Evaluation, Surveys, Affinity Mapping, Journey Mapping, User Personas, Competitive Analysis, A/B Testing, Data Analysis

UX Design: Wireframing, Prototyping, Interaction Design, Information Architecture, User Flows, Storyboards, Design Systems, Accessibility (WCAG, Section 508)

Tools: Figma, Miro, Jira, Confluence, Microsoft Office, Google Workspace, Git/GitHub, VSCode, Xcode

Technical: HTML/CSS, JavaScript, React, Swift, Python

EXPERIENCE

UX Designer Intern | Blackbaud

June 2024 – August 2024

- Led end-to-end UX design of a new CRM page, conducting 20+ stakeholder discovery and concept testing interviews to surface user needs and validate design decisions
- Created wireframes, user flows, and high-fidelity Figma prototypes, iterating based on usability testing feedback to reduce navigation time and improve constituent data visibility
- Partnered with product managers, engineers, and researchers to align business requirements with user needs, ensuring a cohesive, accessible final product

Software Development Engineer Intern | Zillow

June 2022 – August 2022

- Collaborated with design and product teams on UI improvements to a Tour Button CTA, integrating real-time availability data to increase feature visibility and drive higher conversion
- Configured and analyzed A/B tests on UI variations, applying usability insights to inform data-driven design decisions for future product iterations
- Built reusable React components in an Agile environment, gaining hands-on experience with design-to-development handoff and front-end implementation

Naval Research Enterprise Intern | U.S. Naval Research Laboratory

May 2021 – July 2021

- Held an active Top Secret security clearance, ensuring full compliance with security protocols while contributing to sensitive software research projects
- Optimized performance of four Wi-Fi software-defined radio modulations, achieving 2x–8x improvements in processing speed through systematic testing and analysis

PROJECTS

Flikshop — UX Research & Redesign

August 2024 – May 2025

- Led end-to-end UX research across 5 Agile sprint cycles for a cross-functional redesign of Flikshop's digital platforms, synthesizing qualitative findings to align client goals with user needs
- Delivered research artifacts including affinity maps, user personas, and journey maps that directly informed information architecture and navigation redesign decisions, improving content discoverability and brand cohesion

HortiCare — iOS App Design & Development

March 2023 & March 2024

- Designed and built an interactive iOS plant care app in Swift, conducting user research to define core features and task flows for managing and tracking houseplant health
- Redesigned the app's visual system in Figma to align UI with brand identity, improving design consistency and overall product cohesion across all screens

EDUCATION

M.S., Human-Computer Interaction | University of Maryland, College Park

August 2023 – May 2025

B.S., Computer Science | University of Maryland, College Park

August 2019 – May 2023

Minor in Sociology
